For your **HouseRent/HomeRent Project**, you can write the **Brainstorm & Idea Prioritization** section like this:

Brainstorm & Idea Prioritization

Brainstorming was conducted to identify common challenges faced by tenants and property owners in the house rental process. The team discussed various real-world problems such as difficulty in finding suitable rental properties, lack of centralized property information, inefficient communication between tenants and landlords, and the absence of a convenient booking system. Multiple ideas were generated and evaluated based on feasibility, user demand, technological implementation, and potential impact.

After analyzing different concepts, the idea of **HouseRent**, an online house rental and property booking platform, was selected as the most practical and beneficial solution. The platform aims to simplify property discovery, booking, and management through a modern web application built using the MERN stack.

Brainstormed Ideas

Idea	Description	Priority
Online House Rental Platform	Search, view, and book rental properties online	High
Property Recommendation System	Suggest properties based on user preferences	Medium
Real-Time Chat System	Direct communication between tenants and owners	Medium
Property Review and Rating System	User feedback on properties and landlords	Medium
Online Rent Payment Integration	Secure online payment processing	Low (Future Enhancement)

Idea	Description	Priority
Virtual Property Tours	Interactive property viewing experience	Low (Future Enhancement)

Selected Idea: HouseRent

The HouseRent platform was prioritized because it addresses the growing demand for digital rental services. It provides a centralized marketplace where users can search properties using advanced filters, save favorite listings, book properties, receive notifications, and manage rental activities efficiently. Property owners can add, update, and manage listings through a dedicated dashboard, making the platform beneficial for both tenants and landlords.

Reasons for Selection

- High demand in the rental housing market.
- Reduces time and effort in finding rental properties.
- Provides easy access to property information from anywhere.
- Supports efficient property management for owners.
- Offers a user-friendly and responsive web interface.
- Can be expanded with future features such as payment gateways, chat systems, and role-based authentication.

Expected Impact

The HouseRent application improves accessibility to housing information, enhances transparency in rental transactions, and creates a convenient digital platform for property owners and tenants. By leveraging modern web technologies, the system contributes to a more efficient and organized rental ecosystem.

Step-1: Team Gathering, Collaboration and Select the Problem Statement (HouseRent Project)

Brainstorm & idea prioritization (HouseRent Project)

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👤 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

- Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
- Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.
- Learn how to use the facilitation tools**
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we provide an easy, reliable and secure platform for users to find, book and manage rental properties online?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping (HouseRent Project)

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP
You can write 1 idea per sticky note or several ideas per sticky note if they are short phrases.

Anwar

Easy property search	Advanced filters (location, price, type)
Property details with photos	Save favorite properties

Yuktesh

Online booking system	Booking history & tracking
Notification center	Payment status tracking

Person 3

Owner dashboard	Add / Edit / Delete listings
Inquiries management	Property approval system

Person 4

User registration & login	User profile management
Responsive UI / Mobile friendly	Secure & fast platform

Person 5

Map view for properties	Amenities based search
Virtual tour (360°)	Real-time availability

Person 6

Email / SMS notifications	Booking cancellation option
Reviews & ratings	Report inappropriate listings

Person 7

Blog & articles section	Testimonials section
FAQ section	Help & Support

Person 8

Admin dashboard	Manage users
Analytics & reports	System settings

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

TIP
Add customizable tags to sticky notes to mark it easier while grouping together similar ideas. Use colors, important icons or themes within your mock.

1. Property Discovery

Easy property search	Advanced filters (location, price, type)	Property details with photos
Map view for properties	Amenities based search	Real-time availability

2. Booking Management

Online booking system	Booking history & tracking	Payment status tracking
Booking cancellation option	Notification center	Email / SMS notifications

3. User Experience

Save favorite properties	User registration & login	User profile management
Responsive UI / Mobile friendly	Help & Support	Reviews & ratings

4. Owner / Landlord Features

Owner dashboard	Add / Edit / Delete listings	Inquiries management
Property approval system	Testimonials section	FAQ section

5. Content & Engagement

Blog & articles section	Testimonials section	Help & Support
FAQ section	Reviews & ratings	Report inappropriate listings

6. Admin & Management

Admin dashboard	Manage users	Analytics & reports
System settings	Property approval system	Report inappropriate listings

Step-3: Idea Prioritization (HouseRent Project)

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
