

Problem – Solution Fit Template (HouseRent Project)

Purpose

The Problem–Solution Fit helps identify the major challenges faced by tenants and property owners in the rental market and demonstrates how the HouseRent platform effectively addresses these challenges. By understanding customer behavior, pain points, and expectations, HouseRent provides solutions that improve the overall property rental experience.

Problem – Solution Fit Canvas

Customer Problem	Current Situation	Impact on Customer	HouseRent Solution	Expected Benefit
Difficulty finding suitable rental properties	Users search multiple websites and offline sources	Time-consuming and confusing process	Centralized property search platform with advanced filters	Faster and easier property discovery
Incomplete or outdated property information	Property details are often inaccurate or missing	Poor decision-making and wasted visits	Detailed property listings with photos, amenities, and descriptions	Better property evaluation
Difficulty comparing multiple properties	Information scattered across different platforms	Inconvenience and uncertainty	Property browsing and favorites system	Easy comparison of properties
Complex booking process	Manual communication and paperwork	Delays and inefficiency	Online property booking workflow	Quick and secure booking process
Lack of booking status visibility	Users cannot track booking progress	Uncertainty and frustration	Booking history and status tracking	Improved transparency
Delayed communication with property owners	Responses may take a long time	User dissatisfaction	Notification system and inquiry management	Faster updates and communication

Customer Problem	Current Situation	Impact on Customer	HouseRent Solution	Expected Benefit
Difficulty managing property listings	Owners manually advertise properties	Reduced visibility and increased effort	Owner dashboard for listing management	Efficient property management
Lack of property promotion	Limited reach to potential tenants	Lower occupancy rates	Online marketplace exposure	Increased customer reach

- Property activity alerts.

Owner Dashboard

- Add property listings.
 - Update property details.
 - Delete inactive listings.
 - Manage inquiries and bookings.
-

Problem–Solution Fit Statement

Problem:

Tenants struggle to find reliable rental properties efficiently, while property owners face challenges in advertising and managing their listings effectively.

Solution:

HouseRent provides a centralized online rental platform that allows tenants to discover, compare, save, and book properties while enabling property owners to manage listings and connect with potential tenants through a secure and user-friendly interface.

Fit:

By addressing the most common pain points in the rental ecosystem, HouseRent creates value for both tenants and property owners, resulting in improved accessibility, transparency, efficiency, and customer satisfaction.

Expected Outcomes

For Tenants

- Reduced search time.
- Better property selection.
- Easy booking process.
- Improved rental experience.

For Property Owners

- Increased property visibility.
- More tenant inquiries.
- Simplified listing management.
- Higher occupancy rates.

For the Platform

- Enhanced user engagement.
- Greater customer satisfaction.
- Scalable rental marketplace.
- Sustainable business growth.

PROBLEM – SOLUTION FIT

Aligning Real Problems with Smart Solutions for Better Mental Health

CUSTOMER PROBLEMS

- Many people suffer from anxiety and depression without knowing at an early stage.
- Traditional diagnosis requires clinic visits and long wait times.
- Lack of continuous monitoring of mental well-being.
- Low awareness and stigma make people hesitate to seek help.

OUR SOLUTIONS

- Mental health detection using smartwatch sensors (HRV, HR, GSR, Sleep).
- AI/ML models analyze patterns to detect anxiety & depression early.
- Real-time monitoring and insights on the mobile app dashboard.
- Private, accessible and stigma-free support through app & resources.

VALUE DELIVERED

- Early detection & timely intervention
- Personalized insights & recommendations
- Continuous tracking of mental well-being
- Improved quality of life & mental resilience

AI POWERED MENTAL HEALTH DETECTION

- Anxiety Detection
- Depression Detection
- Stress Monitoring
- Mood Insights

KEY FEATURES

- Continuous Monitoring
- AI Based Detection
- Real-time Alerts
- Insights & Reports
- Personalized Recommendations
- Secure & Private

“ Our solution fits the real-world problems by providing an early, accurate, and accessible way to detect and manage mental health conditions using wearable technology. ”

TARGET USERS

- Students
- Working Professionals
- Elderly Individuals
- Anyone facing Stress/Anxiety

GO-TO-MARKET STRATEGY

- Digital Marketing & Social Media
- Partnerships (Clinics & NGOs)
- Influencer Collaborations
- Educational Webinars
